Portfolio: firos.in

SUMMARY

Full-stack software engineer with experience in designing and optimizing scalable systems, building real-time applications, and deploying cloud-native solutions. Skilled in distributed computing, API design, and performance tuning, with a track record of delivering secure, high-performance products.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript, Java, Python

Frontend: React.js, Next.js, Tailwind CSS

Backend & Tools: Node.js, FastAPI, Prisma ORM, Notion API, Git, GitHub, VS Code

Cloud & DevOps: AWS (Lambda, API Gateway, S3, IAM, CloudWatch), Vercel

Other Skills: Scalable system design, API optimization, secure authentication (JWT, OAuth2), REST APIs, WebSockets

EXPERIENCE

Specialist Programmer

Sep. 2024 – Present

Infosys Ltd.

Bengaluru

- Developed and maintained full-stack enterprise applications using Java (Spring Boot) and React, focusing on RESTful API design, data consistency, and modular architecture.
- Implemented and integrated APIs between backend and frontend modules, improving response efficiency and reducing interface load time by 20%.
- Generated deployable WAR files for React frontend builds and contributed to packaging automation for Spring Boot services, preparing production-ready releases for Azure Cloud.

Backend Intern

Sep. 2023 – Jan. 2024

TalentMonk pvt ltd

Bengaluru

- Developed dynamic REST APIs handling flexible schemas for Google Forms-style survey systems, storing responses efficiently in CSV and PostgreSQL.
- Created an API-driven skill management module, with automated schedulers sending reminders to increase survey completion rates.
- Optimized database queries using Prisma ORM, improving data retrieval performance and scalability for growing datasets.

Project Intern

Nov. 2022 – Jun. 2023

Samsung PRISM

Remote

- Co-developed a Deep Learning model for multilingual phoneme generation, integrating it into a Flutter mobile app for deployment.
- Managed GitHub workflows and collaboration, achieving all project KPIs and deliverables on schedule.

PROJECTS

Folder Structure Generator (VS Code Extension) | *TypeScript, Node.js, VS Code API, Git*

- Built a VS Code extension (100+ downloads) to generate clean, indented folder trees, now used by developers in multiple countries.

Multiplayer Drawing & Guessing Game | *React, Node.js, Socket.IO, Git*

- Designed real-time gameplay for multiple concurrent rooms with synchronized drawings, chat, and scoring.
- Leveraged WebSockets to achieve instant updates and low-latency user interactions.

FazBrain | *Next.js, TypeScript, Tailwind CSS, Notion API, PWA*

- Integrated Notion API as a headless CMS to dynamically manage notes and blog content.
- Added offline support & Web Share Target API for a native-like mobile experience.

EDUCATION

Cambridge Institute of Technology

B.E. in Computer Science(CGPA: 8.91)

Bengaluru,Karnataka

July 2020 — June 2024

Durga HSS Kanhangad

Maths, Computer Science

Kerala

July 2018 — March 2020

ACHIEVEMENTS AND CONTRIBUTIONS

Novu: Contributed to Novu by implementing a Viber Chat provider, expanding messaging integrations for the open-source community.

SSoC: Participated in SSoC (Summer of Code) — bug fixes in backend services and algorithms.
Contributor Certificate
